

Dear Conyers Family Dental Center Patient,

Dentures are a dental technology that has been in use for over 100 years. The technology and materials have improved, but the functionality and sometimes comfort has not. Dentures are an inexpensive way to replace missing teeth. Dentures will not fit, feel or function like your natural dentition. Dentures are a prosthetic, just like devices replacing an arm, foot or leg. The bite force for individuals wearing dentures is diminished by 50% or more. Dentures will feel like you have a mouth full of plastic. This is because you do!

In many cases, we can create an upper denture that will fit and hold suction without the use of any type of adhesive. The lower denture, on the other hand, will not fit well. The only way for us to create a good fitting lower denture with minor movement is with the placement of dental implants. Unless dental implants are utilized, we want you to understand that the lower denture will not stay in place.

We take x-rays and do an examination on all of our patients. This is to make certain that we are not rendering treatment on teeth that should not be treated. This is a Georgia state law and anything less is malpractice.

We are a denture clinic that provides mainly dentures and extractions at an extremely affordable and fair price. The dentures we make are made from quality materials. When you make an appointment with our office, we want you to understand that we are making a custom appliance just for your mouth. This means that we cannot sell it to anyone else but you. Once we make an impression of you, you are committed! There will be no refunds of any kind once we have started treatment and we have taken your initial impression.

If your denture should fall or crack, please do not attempt to glue it together. This will prevent us from being able to repair it and will result in you having no other choice than to have a new one made.

As a courtesy, we offer 3 free adjustments. These adjustments do not include relines. Relines are a totally different procedure and you will be charged for relines. If you are in agreement with our office policies, please sign and date below as we will be happy to serve you.

Thank you,

*Conyers Denture and Implant Center*
